REASONS FOR ALLOWANCE

Application History

1. This action is responsive to the Request for Continued Examination, filed on 4/25/2005.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after a final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office Action (dated 1/3/2005) has been withdrawn pursuant to 37 CFR 1.114.
3. Applicant has amended claims 1, 2, 10, 11 and 16.
4. Claims 1-18 are pending in the case, claims 1, 10 and 16 are independent claims.
5. Examiner's rejections of claims 1-18, made under 35 USC 102 as being anticipated by Microsoft Office 97 Copyright 1983-1996 by Microsoft Corporation as recited in the previous office action (dated 1/3/2005) are withdrawn in view of the amended claims.

Reasons for Allowance

6. The following is the examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art of record neither anticipates nor suggests to a person of ordinary skill, at the time the invention was made, the claimed feature of creating the document reminder in a seamless manor without requiring a user to manually access a different application program. This limitation, that was added with the amendment and RCE filed on 4/25/2005, distinguishes the invention over the prior art of record.

Regarding independent claim 10, the prior art of record neither anticipates nor suggests to a person of ordinary skill, at the time the invention was made, the claimed feature of automatically determining whether an application capable of polling a database of document reminders is active. This limitation, that was added with the amendment and RCE filed on 4/25/2005, distinguishes the invention over the prior art of record.

Regarding independent claim 16, the prior art of record neither anticipates nor suggests to a person of ordinary skill, at the time the invention was made, the claimed feature of automatically determining whether a checking application is active without intervention by a user, and automatically activating a background checking program without intervention by a user. This limitation, that was added with the amendment and RCE filed on 4/25/2005, distinguishes the invention over the prior art of record.
